

REQUEST FOR PROPOSALS FOR EMISSIONS OPTIMIZATION AND ACTIVELY MANAGED CHARGING STORAGE CONSULTANT

I. PURPOSE

The Connecticut Green Bank (“Green Bank”) seeks proposals from qualified consultant (“Contractor”) to advise and consult regarding the development of an Emissions Optimization Plan and an Actively Managed Charging Proposal for battery energy storage systems (BESS).

II. GREEN BANK BACKGROUND

The Green Bank was established by the Connecticut General Assembly in 2011. As the nation’s first green bank, it is leading the clean energy finance movement by leveraging public and private funds to scale-up renewable energy deployment and energy efficiency projects across Connecticut. The Green Bank’s success in accelerating private investment in clean energy is helping Connecticut create jobs, increase economic prosperity, promote energy security and address climate change. In 2017, the Green Bank received the Innovations in American Government Award from the Harvard Kennedy School Ash Center for Democratic Governance and innovation for their “Sparking the Green Bank Movement” entry. For more information about the Green Bank, please visit www.ctgreenbank.com.

III. PROGRAM BACKGROUND

On July 28, 2021, the Connecticut Public Utilities Regulatory Authority (PURA) issued a Final Decision in Docket No. 17-12-03RE03,¹ which established a statewide behind-the-meter electric storage program titled Energy Storage Solutions (Program), available to all customers and customer classes within the service territories of The Connecticut Light and Power Company d/b/a Eversource Energy (Eversource) and The United Illuminating Company (UI), collectively the electric distribution companies (EDCs). The Program is now being administered through PURA Docket No. 22-08-05.²

As part of these proceedings, the Green Bank submitted a proposal to reduce Program emissions, including by prioritizing BESS deployment in high emission areas, and by developing an Actively Managed Charging Plan for BESS enrolled in the Program. Several docket participants subsequently provided testimony on the Green Bank’s proposal.

The Green Bank has been directed by PURA to issue an Emissions Optimization Plan scoped to target areas with the highest differential between peak and trough emissions by August 1, 2023.

¹ The 17-12-03RE03 Final Decision is available at [click here](#)

² The 22-08-05 Final Decision is available at [click here](#)

Order No. 13 of the 22-08-05 [Final Decision](#) reads:

No later than August 1, 2023, the CGB shall submit for the Authority's review and approval, a marketing plan scoped to target areas with the highest differential between peak and trough emissions on a temporal scale over which a battery will charge and discharge (e.g., daily) so that there may be sufficiently high differential in the marginal operating emissions rate of the grid between the time of charging and the time of discharging, ultimately leading to reductions in emissions. The marketing plan scope shall include information on potential marketing activities, customer demographics of those who have installed or applied for battery storage to date and potential customers in the target locations, benefit-cost analysis, expected outcomes from such a marketing plan, and scope objectives. Further, the marketing plan scope must also contain data collection and evaluation requirements, in addition to an estimated budget, and a timeline for implementation. The Authority further directs the CGB to review the joint written comments of the Institute for Policy Integrity and WattTime when creating the marketing plan scope. The marketing plan scope shall be filed with the plan to implement actively managed charging in the ESS Program in Docket No. 23-08- 05.

22-08-05 Final Decision, p. 40.

Further, the Green Bank has been directed to develop an Actively Managed Charging Proposal for the Program by August 1, 2023, and the Proposal must be fully implementable by January 1, 2024.

Order No. 14 of the 22-08-05 [Final Decision](#) reads:

No later than August 1, 2023, the CGB shall submit for the Authority's review and approval a plan to implement actively managed charging as a part of the ESS Program, so that emissions are most effectively reduced by the Program. The actively managed charging plan must include any necessary penalties and/or incentives required to ensure the success of the proposal, in addition to clear justification for said penalties and/or incentives. The actively managed charging plan must also discuss the proposal's feasibility and locational impacts and include a cost estimate and timeline for successful implementation. Moreover, the plan must reference which vendor will be used to gather the data necessary to implement the plan, in addition to specifying any emissions impact analysis which would need to be completed before the plan's implementation. Further, the Authority directs the CGB to review the written comments provided by relevant stakeholders on managed charging design before creating the proposal, including the written comments of NECEC, CPower, and Sunrun referenced in section IV.G. The actively managed charging plan shall be filed in Docket No. 23-08-05 with the marketing plan scope outlined in the preceding order. Finally, for the avoidance of doubt, the proposed plan must be fully implementable with one or more vendors by January 1, 2024.

22-08-05 Final Decision, p. 41.

The Green Bank seeks to hire a consultant to help develop the Emissions Optimization Plan and Actively Managed Charging Proposal for the Program.
