

Customer Story

Denise and Doug are enjoying their newly installed solar and battery storage system.

When they bought their home in 2021, Denise and Doug considered going solar to reduce their energy costs and become more environmentally sustainable. When they learned about backup power through a battery, it made sense. The Generac battery could provide energy in the case of a storm or outage to power their well pump and other key appliances. The Energy Storage Solutions program helped reduce the cost of the battery.

Location

Durham, CT

Energy Upgrade

Battery storage system paired with a solar PV system

“Going solar and adding a battery will provide us with peace of mind when a storm is on the horizon. We hope others will be motivated to do this also.”

Doug

Energy Storage Solutions is a new incentive program designed to help Eversource and UI customers install energy storage at their home or business by reducing the upfront costs. Energy storage can help customers across Connecticut become more secure in the face of our changing climate. This program will help create a more reliable, resilient Connecticut, especially for vulnerable communities and those hit hardest by storm-related outages.

This program is overseen by the Public Utilities Regulatory Authority (PURA), is paid for by ratepayers, and is administered by the Green Bank, Eversource, and UI.
