

## contractor

### Partner Story

### Earthlight Technologies, LLC is now among the leading contractors using Green Bank financing.

**Earthlight is a family-owned and operated business that specializes in residential and commercial solar, EV charging, and energy efficiency projects.** They have grown from a small retail store selling residential energy efficiency products in 2008, to their current position as a premier clean energy contractor with over 100 employees. Earthlight credits the Green Bank as a factor in their growth, utilizing many of its home and building solutions to provide financial assistance to a diverse array of customers.

"The Connecticut Green Bank has been an essential part of our success in Connecticut. Their innovative financing programs and dedicated staff have provided us with fuel to grow our business and make clean energy accessible and affordable to Connecticut residents."

*Sam Schneider, Owner and President of Earthlight Technologies*
