Vikram		Unirac

Any equipment not listed in the approved vendor list will be evaluated on a case-by-case basis, with no guarantee of approval. The evaluation will require detailed information, including warranty details, a list of completed U.S. projects with dates, any third-party reports on product quality or bankability, and the company's financial information, such as audited financial statements.

¹ BNEF Tier 1 modules will be evaluated on a case-by-case basis for approval.

² If installing ballast blocks, these must comply with either ASTM C1491 for roof pavers, and/or ASTM C1884 for concrete ballast block.
