Customer Story

Clean Energy With a Great Mission

Easterseals Capital Region & Eastern Connecticut is a well known local and regional organization that provides important resources for individuals with disabilities, veterans, seniors, and their families. Along with their meaningful mission, they have kept sustainability in mind throughout their work. Easterseals has worked with the Connecticut Green Bank to finance a 218-kilowatt rooftop solar system and advanced lighting controls through our Commercial Property Assessed Clean Energy (C-PACE) program. With their new upgrades, Easterseals is projected to save approximately \$1.3 million in energy costs over the lifetime of the equipment, allowing them to invest more into their invaluable resources.

Location

Easterseals Capital Region & Eastern CT • Windsor, CT

Energy Upgrade

218 kW rooftop solar pv system
Advanced lighting controls

Projected Energy Savings

\$1.3 million over the life of the upgrades

*While C-PACE can cover up to 100% of project costs, the C-PACE financing amount is not reflective of the total project cost, which may include owner contributions, incentives, utility or other grants, renewable energy credits or other funding.

“We’re so grateful to the Connecticut Green Bank for a partnership that has allowed Easterseals to upgrade our facility with solar and smart lighting helping us to operate more efficiently and sustainably. The best part is that the savings and revenue we generate from these improvements will go right back into our community services, allowing us to further our mission.” – *Robin Sharp, President and CEO of Easterseals*
