

c-pace quarterly update

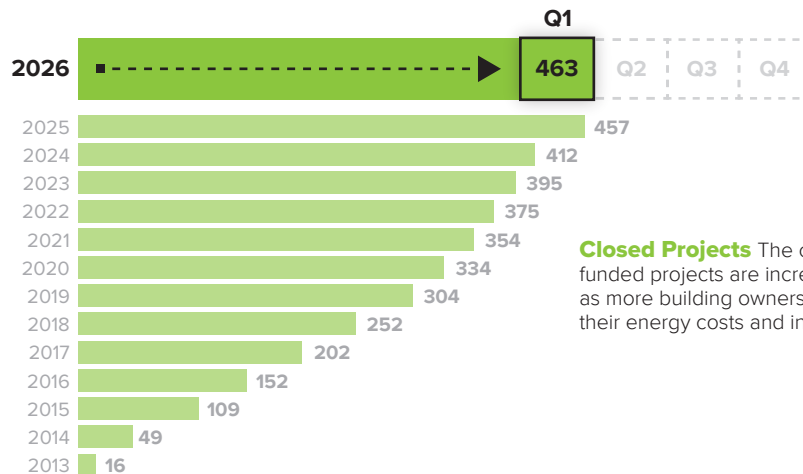

C-PACE (Commercial Property Assessed Clean Energy) is an innovative program that makes green solutions more accessible and affordable. Thanks to the building owners, contractors and other stakeholders who are using the program to accelerate the green energy movement – Connecticut’s C-PACE program has seen growing investment, enabled diverse energy saving improvements, and has made a significant impact on the community. **This quarterly dashboard tracks these measures:**

INVESTMENT

C-PACE is Growing

The total amount of project financing continues to grow as more energy saving projects are closed.

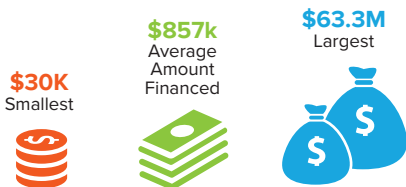

\$397M
total closed project financing

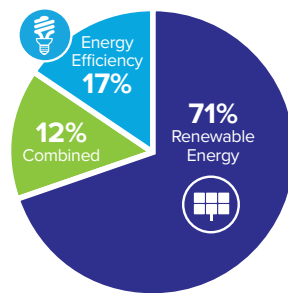

Closed Projects The cumulative number of funded projects are increasing every quarter as more building owners take action to reduce their energy costs and increase NOI.

IMPROVEMENTS

All Sizes of Projects C-PACE can bring virtually any green energy project, small or large, from a vision to a reality.

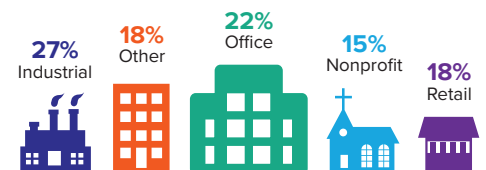

All Types of Green Energy From simple boiler replacements to solar C-PACE works for any upgrade that reduces energy costs.

All Shapes of Properties

From manufacturing facilities to YMCAs all commercial properties are eligible to use C-PACE for an energy saving project.

IMPACT

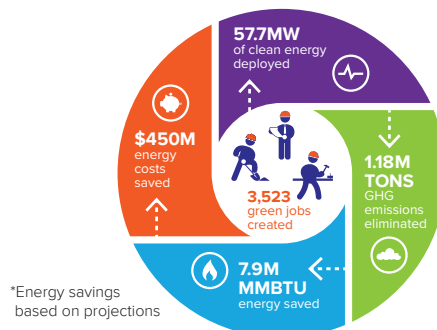

Making Green Work

With financing available or hard and soft costs, C-PACE contractors can design comprehensive projects and gain access to new customers.

119 contractors have completed at least one C-PACE project

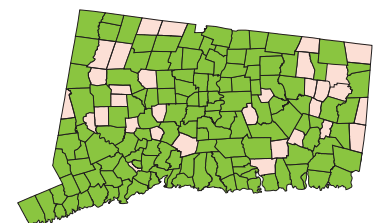

The Power of Green Energy*

C-PACE projects are creating jobs, saving businesses millions of dollars, and supporting a cleaner, healthier environment.

More Green Communities

Nearly 140 participating cities and towns can use C-PACE to fuel economic development, make their community cleaner, and help their citizens thrive.
